Summary

Data Analyst with over 5 years of professional experience in Data Visualization, Database Management, and Systems Development. Proven track record in Project Management, transforming manual financial and operational workflows into automated Business Intelligence solutions. Expert at using Power BI and DAX to synthesize complex datasets from disparate units into predictive models that drive operational efficiency and mitigate business disruptions.

Work Experience

Financial Analyst *June 2025 – Present*

APPEDOLOGY PVT LTD., KARACHI

- Model and synthesize end-to-end financial data for the Check Processing & Reconciliation Team, ensuring 100% accuracy in high-stakes financial reporting and stakeholder management.
- Automate finance workflows through Systems Development and custom tool implementation, reducing manual reconciliation time by 40% and enhancing operational efficiency.
- Author detailed Process Documentation for bank management and compliance, utilizing Visio to map financial data integration points and prevent operational disruptions.
- Evaluate vendor payment cycles and identify root causes for discrepancies, developing predictive reporting to forecast cash flow requirements.

Reporting Executive *July 2024 – May 2025*

ABIC - MUDITA (PVT LTD), KARACHI

- Automate complex dashboards for inventory variance, RMA tracking, and ASN processing, utilizing Data Modeling to provide real-time visibility for T-Mobile stakeholders.
- Evaluate Workforce Management Analytics to streamline reporting workflows, ensuring seamless Data Integration across disparate telecommunication client systems.
- Synthesize historical inventory data to deliver actionable insights and predictive trends, supporting executive decision-making and preventing supply chain disruptions.
- Author Technical Writing for system requirements and Business Intelligence reporting standards to maintain data integrity across all reporting platforms.

Reporting analyst *January 2020 – December 2024*

ANFAL ENTERPRISES, KARACHI

- Synthesize bi-weekly operational reports from hybrid legacy systems for China HR, employing Data Integration techniques to optimize store performance.
- Automate employee commission calculation models using advanced Excel and VBA, increasing transparency and clarifying workforce management metrics.
- Model retail store performance data to identify root causes of inefficiency, supporting regional Project Management initiatives for store optimization.
- Evaluate historical financial trends to develop predictive reporting for trading outcomes, ensuring consistent business visibility for senior management.

Education

Bs. in Accounting & Finance (Graduation) *January 2020 – December 2023*
BBSUL, KARACHI
